

The Perfect Roll Model for the Roller Industry

The roller market uses the widest array of elastomers in the rubber industry. Finding the right rubber compound for your application can be challenging.

Not when you turn to **HEXPOL**, the obvious choice.

Serving the roller industry since 1983 means we understand your application. Chances are we've seen it before and formulated a compound with the precise performance requirements. **HEXPOL** has thousands of off-the-shelf roller compounds for virtually every conceivable application in industries such as:

■ **Printing** ■ **Pulp & Paper** ■ **Steel** ■ **Aluminum** ■ **Textiles**

We are second to none when it comes to comprehensive immersion, physical properties, analytical, and life cycle testing. **HEXPOL's** testing, chemistry, and market knowledge ensure that our formulations perform in harsh roller industry conditions – meeting or exceeding your requirements.

As part of the **HEXPOL** family, Kennedale provides tailored customer service and support, as well as leading technology for the industrial roller market.

For more information about rolls, visit HEXPOLkennedale.com or call 526-945-1241.
